General Wood Instructions

Sanding

The rule of sanding is “Never across the grain”.

1. Do not tear sandpaper. If you do, the ragged edges will often scratch the wood surface.
2. For flat surfaces, wrap a piece of sandpaper around a block of wood or use a store bought holder. Start with a coarse grade of paper and finish with a fine grade of paper(not included).
3. Be consistent. Do not sand one area with fine and another with coarse grade.

Staining

1. Be sure the wood surface is smooth and clean. Stains can accentuate any roughness or scratches of cross grain sanding. Wipe off any dirt or dust with a soft cloth.
2. A base coat of sealer/primer and a light sanding before applying stain will insure a uniform stain.
3. Apply stains in one direction following the wood grain. Use a soft brush or foam brush. Let the stain penetrate the wood, then wipe off excess stain with a soft cloth.
4. If stain looks too dark, dampen the cloth with water/thinner and wipe until you achieve the desired color. If stain is too light, let dry, then apply another coat of stain and wipe off.

Finishes

1. Outdoor projects may be finished with polyurethane or varnish.

These are toxic and must be used in a well ventilated area. Indoor projects may be finished with decoupage or left unfinished.

Safety First!

This Product May Contain Silicon Gel Packets.
REMOVE PRIOR TO USE!

SH18

Product Instructions:

1. Sand all wood parts until smooth. Wipe off excess dust with a soft cloth. Decorate pieces with paint or stain before assembly. A combination of paint and stain looks great!

Note: Glue wood parts together before nailing. This process will help hold parts in place while reinforcing with nails.

2. Take bottom (B) and lay on a flat surface with wrong side facing up. This is where you will attach runners. Apply glue to top section of one runner (E), and press onto long edge of the bottom. Repeat with the other runner. Nail into place.

3. Turn bottom (B) over with runners attached. Bottom piece should be sitting on top of runners. Use a ruler and measure approximately 1" from both short ends of the bottom piece. Mark the entire width on both sides with a pencil.

4. Apply glue to long narrow ends of the front piece (D) and press onto the pencil mark closest to the front of the runners. Apply glue to long narrow edge of back (C) and press onto the opposite pencil mark. Let dry. Hammer nails in at all 4 corners of the underside base into the back and front.

5. Apply glue along the narrow edge of curved side (A) and press onto long top edges of bottom (B). Repeat this process for the other side. Nail at all 4 corners into front and back pieces. Display all kinds of items such as cards, fruit, nuts, ornaments, etc.
