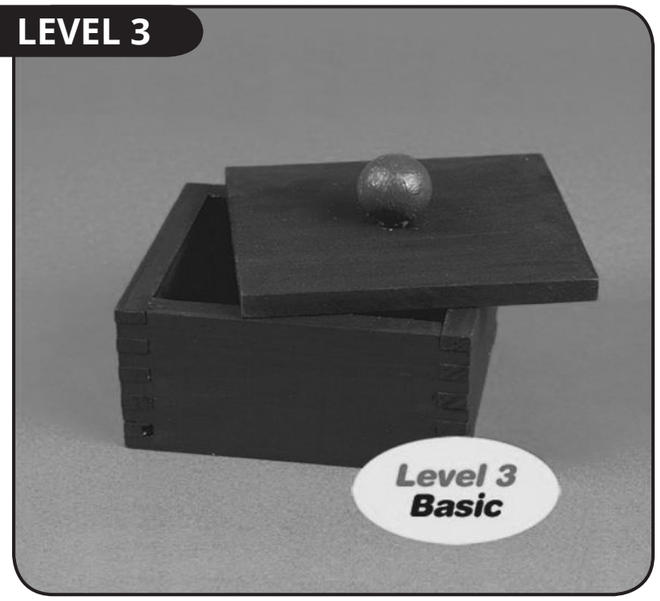
LEVEL 3
Basic

INSTRUCTIONS:

1. Assemble the box by slot-fitting the sides together with the top and bottom.
2. Sand the rough pieces.
3. Paint a base coat on the box and the knob. Allow to dry.
4. When box is completely dry, glue on the knob.
5. Let the glue dry before handling the box.

LEVEL 3



MORE IDEAS...

Try making a set of pieces to use as a puzzle. Paint them up, let them dry, and see if you can put them together without any help.

TIP: You may want to use a foam brush for the base coat.

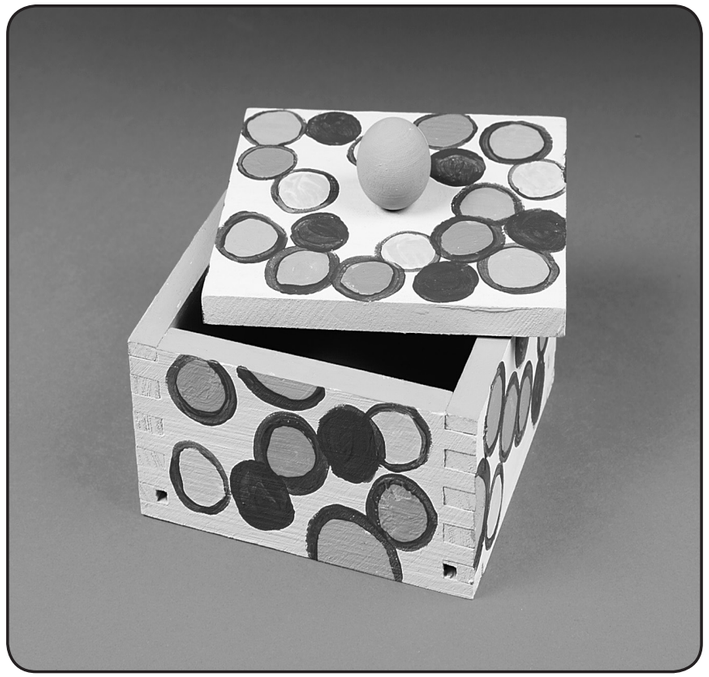
THERACRAFT™

Wooden Boxes (Pk/12)

PLEASE READ ALL INSTRUCTIONS BEFORE STARTING



YOUR KIT CONTAINS:
- Precut Wooden Box Pieces
- Paint
- Brushes
- Plastic Table Cover

YOU WILL NEED:
- Container of Water
- Pencil
- Buttons or Other Traceable Objects
- Tacky Glue
- Paper Towels
- Ruler (optional)

AGE GROUP: 6 and up
PROJECT TIME: 30 minutes

STEP 1: PATIENT LEVELS
Assess client to determine project level. This booklet contains three sets of instructions. One level for lower functioning patients (Level 3), one level for mid-level functioning patients (Level 2) and one level for patients operating within normal or almost normal ranges of functioning (Level 1).

STEP 2: PREPARATION
Please read all instructions fully before starting project. Make sure your work surface is properly protected. Collect necessary supplies and lay them out within reach of you and your client. Being prepared will help the project go more smoothly.

STEP 3: Proceed to the appropriate section for your chosen level.

GP1773

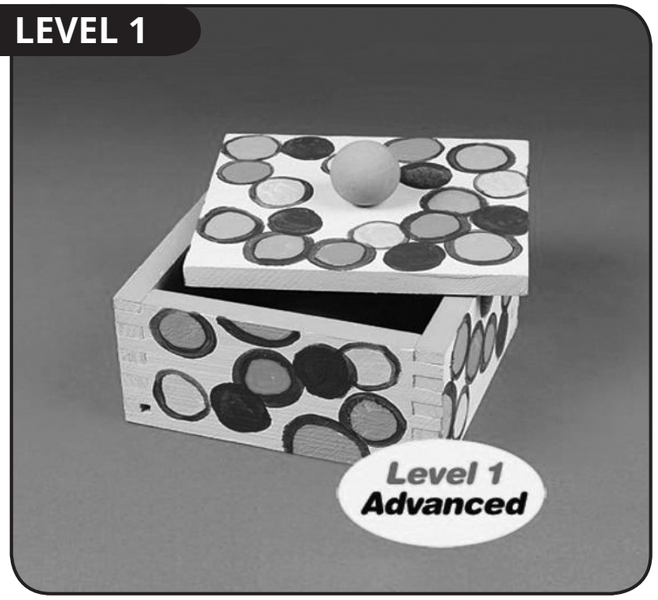
LEVEL 1

Advanced

INSTRUCTIONS:

1. Plan your design.
2. Assemble the box by slot-fitting the sides together with the top and bottom.
3. Sand the rough pieces.
4. Paint a base coat on the box and the knob. Allow to dry.
5. Paint more detailed or intricate designs on the box. You can freehand your paint decorations or you can trace objects. We used buttons and coins to create the circles you see in our example.
6. When box is completely dry, glue on the knob.
7. Let the glue dry before handling the box.

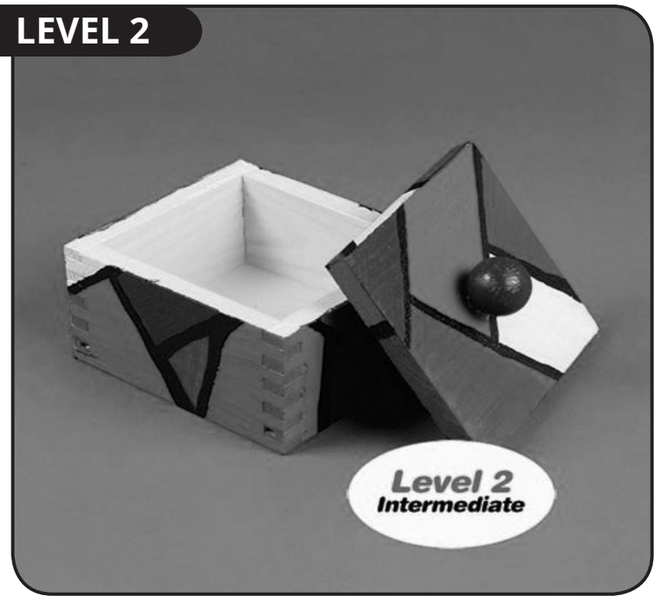
LEVEL 1



LEVEL 2

Intermediate

INSTRUCTIONS:

1. Plan your design.
2. Assemble the box by slot-fitting the sides together with the top and bottom.
3. Sand the rough pieces.
4. Paint a base coat on the box and the knob. Allow to dry.
5. You may want to add a basic design to the box such as the geometric stripes we show in our example. Use a ruler and lightly draw pencil lines.
6. Paint the areas between the lines using different colors.
7. When box is completely dry, glue on the knob.
8. Let the glue dry before handling the box.


LEVEL 2
