

Craftcups

Disposable containers
for Arts and Crafts

AC449
AC450

SAFE • PRACTICAL • CONVENIENT • INEXPENSIVE

Child care centers, kindergarten's, classrooms, art departments and design studios are finding them clean, convenient and inexpensive. Craftcup disposable containers for paints, adhesives and craft materials offer a simple, economical answer to clean-up problems and the dangers of broken glass jars or cups.

Artists, teachers and school officials have been enthusiastic after trying Craftcup containers in actual day to day use.

They are formed of dense paperboard construction. The low profile and flat bottom of the Craftcup container resist tipping. A water-proof coating resists penetration by liquids and wetting agents and prevents premature drying of inks and paints.

Light weight and ability to nest offer ease of storage with minimum space. Craftcup containers can be reused, but their inexpensive price allows disposability at low cost.

Use them for: Finger paints, tempera, poster colors, water colors, oils, acrylics, glues, pastes and other art and craft materials. Also use to hold other craft supplies such as beads, glitter, sequins, seeds, shells and wiggly eyes.

Size: Approximately 2-3/16" base diameter by 1-1/16" height. Made of 10 point stock, coated for moisture resistance.

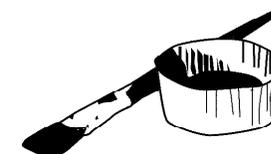

Packed 1,000 to a case-Bulk
Packed 14 tubes/75 ct.-Retail
1,050/case

Made In China
S&S Worldwide
P.O. Box 513
Colchester, CT 06415-0513
