INSTRUCTIONS

GP2022

Project Instructions:

Your seed cards are 100 % organic material and the wild flower garden seeds are imbedded in the cards. The seeds included in this mix are Daisy, Marigold, Sunflower, Poppy and many other kinds.

1. Choose a design for your note card. You may wish to draw out the design in pencil lightly on the card first.

2. Color in the note card with the 100% natural soy crayons. You may use other decorating supplies on the card, such as glue, trims, sequins, glitter, etc.

3. The envelope may be decorated, too.

4. Send your card or give it to someone and then they can plant it in the ground. To plant, just cut up the card, or rip it into sections and plant the paper pieces about 1 inch deep in soil and keep watered. As with any other seeds, plant in warm soil, after risk of frost is past, in the late spring. To germinate faster, dip your card in water first before planting.

5. The paper will disintegrate and then the seeds will begin to grow, so the growing time usually takes longer than planting regular seeds.

NOTE: The more you press on any of the seeds imbedded in the card, the less likely it is to germinate, so only press lightly on the cards.

GREAT WORK!
