Soothing Pat Mat

Thank You for purchasing the Soothing Pat Mat.
We hope you agree that it will be a great addition to your sensory program.

Your new Soothing Pat Mat can be used in many ways. Try filling it with warm water to sooth arthritic or sore hands or try filling it with cool water to bring about a cooling sensation on a warm day.

Regular tap water has some bacteria in it naturally. For that reason, we recommend using distilled water in your Soothing Pat Mat along with several drops of plain white vinegar or Bleach in order to prevent any unwanted growth.

We also recommend draining and changing the water solution every couple of weeks to help prevent any bacteria growth and keep your Soothing Pat Mat in ready-to-use condition at all times.

The Soothing Pat Mat should never be used by infants or toddlers unless it is with adult supervision.
