- Hammer

© Copyright 2012 S&S® Worldwide Inc. All rights reserved. No part of this project may be copied or duplicated without the express written permission of S&S Worldwide.

GP2179

PREP INSTRUCTIONS:

You may want to make copies of the chart sheet for each person. Everyone will need 2 crimp clasps, 1 jump ring, 1 spring clasp, 2 small pieces of clear tape, and access to a hammer, jewelry pliers and scissors to make their bracelet.

INSTRUCTIONS:

- 1. Cut ten 18 inch lengths of cord. Tie an overhand knot in one end (See Figure A). Place the knot in the center hole of the foam board. Separate the strands as shown in Figure A on the chart sheet, as the starting position.
- 2. To Start the first weaving rotation move the cords in the following manner as shown in Figure B:

A. Move cord # 4 to E on the Right (so that's taking #4 on the Left side of the loom and moving it to E on the Right side) Then # 5 to E on the Left side of your loom. You will start every rotation like this. (See Figure B)

B. Move # 13 to 4 (Figure C) (This part B all happens on the Left half of the loom)

3 to 13 (Figure D) # 12 to 3 (Figure E) # 2 to 12 (Figure F)

C. Move # 15 to 5 (Figure G) (This part C all happens on the Right side of the Loom)

#6 to 15 (Figure H) #16 to 6 (Figure I) #7 to 16 (Figure J)

D. Move E to #2, staying on the Left side (Figure K) E to #7, staying on the right side (Figure K)

That completes the first rotation, now start over with steps A-D until your bracelet is the desired length.

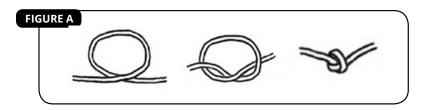

3. A. Carefully remove all 10 cords from your loom; trim the ends even and tape together. The tape will help hold the cord in place so you can hammer on the crimp. The tape can easily be removed once the crimp clasps are in place.

- B. Repeat this on the other end so both ends are crimped tightly together.
- 4. Attach 1 spring hook to a jump ring, and then attach the jump ring to one of the crimp clasps using jewelry pliers. You're bracelet is done, Great Job!

Helpful Hints:

Use a clothespin as a weight to hold the knot down in the beginning of the weaving.

When you want to stop the weaving, in order to keep track of your place, always complete one full sequence.
